

China's Low Carbon Cities: an overview

- 5 provinces and 8 cities as low carbon pilots, set up by NDRC in 2010
- Much more cities and counties made their official announce to develop low carbon cities
- So far, mainly government planning/ action plan

China's Low Carbon Cities: What's next

- To implement the plan
- More precise program: urban planning, city infrastructure, transport programs, agriculture program, public campaign
- Tough targets: lower CO₂ emission per capita, earlier peaking year
- Learn from other cities, especially from foreign cities
