Rationale why Malaysia is adopting LCS

Astute planning & management – on Issues of climate change and global warming; setting targets for a low carbon footprint; and positive support and promotion of a green economy through increased investments in environmental assets, green technology and production.

Without the GREEN, there is no SUSTAINABLE DEVELOPMENT

Projects under LCS

Launched - Iskandar Malaysia Smart City Framework

CASBEE tools (Comprehensive Assessment System for Built Environment Efficiency) – to assess Iskandar Malaysia's regional environmental performance.

Growing interests from Japanese companies to conduct pilots on smart city concepts.

Low Carbon Village at Felda Taib Andak

Essential Mechanisms for Success of LCS
